

Tenda verticale con guide laterali dedicata alla posa sui balconi.

Nella versione con braccetto a caduta,

Il braccetto scorre a caduta nelle guide e può essere fissato nella posizione desiderata, regolabile fino a 160°, tramite un'apposita manopola di bloccaggio.

Nella versione con braccetto a molla.

Il braccetto scorre nelle guide e la regolazione dell'inclinazione avviene per mezzo dell'arganello o motore.

L'installazione può essere fatta sia a parete che a soffitto.
