

It is a pergola entirely made of painted aluminum, moved by a radio-controlled electronic motor, wall-mounted, and allows even very large surfaces to be covered with minimal footprint on the floor.

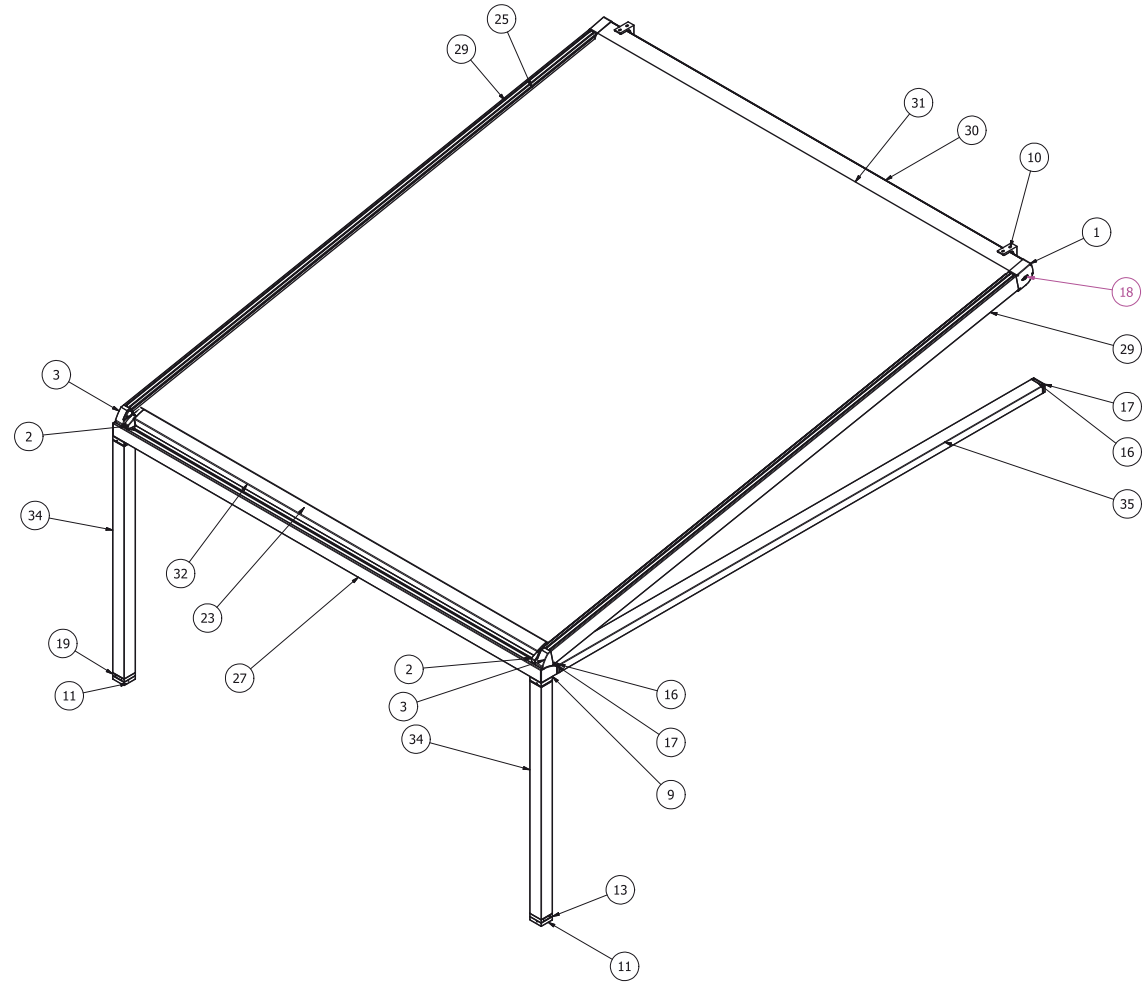

The fabric welded every 60 cm is equipped with side zips, drip seal and traction cords, to keep the fabric perfectly taut, both in opening and closing, it is wound on a reinforced winding tube with a diameter of 100.

The SUPERIOR PACK allows you to cover large underlying spaces, being able to place up to 5 MODULES side by side.
